

Message of the RoHS Test Report

Product color	Data provided by us	Description
Natural	Natural	Use as it is.
	Black	Black color product is natural color product plus black colorant. If RoHS restricted substances are not detected according to the measurement data of black color, it can be said that the above substances are not also detected in natural color, which is the basis for it.
Black	Black	Use as it is.
	Natural and coloring agents	Black color product is natural color product plus black colorant. The combination of measurement results of the natural color and colorant can be used as a substitute for the measurement results of black color. The measurement data of colorants can be used for all colored grades.
Colored product	Natural and coloring agents	A colored grade is natural color plus colorant. The combination of measurement results of the natural color and colorant can be used as a substitute for the measurement results of the colored grade. The measurement data of colorants can be used for all colored grades.
	Black and coloring agents	Black color product is natural color product plus black colorant. If RoHS restricted substances are not detected according to the measurement data of black color product, it can be said that the above substances are not also detected in natural color product, which is the basis for it. Therefore, for a colored grade of natural color plus colorant, the combination of the data of the black color and the measurement results of the colorant can also be used as a substitute for the measurement results of the colored grade. The measurement data of colorants can be used for all colored grades.
Color concentrates	Color concentrates	Use as it is.
